FROM: Frank J. Filas, Reclamation Engineer 

RE: Site Inspections- DOE/019/005, Delore #3; DOE/019/034,
Delores #5

On June 3, 1987, Frank Filas stopped briefly at DOE/019/005 and visited with Blaine Saunders. He was using a backhoe to dig several trenches (for sampling purposes) on the Delore #3 Claim owned by Demar Perkins. He plans to move to the Delores #5 Claim when lower water levels permit (probably July). He stated that he had worked closely with Terry McParland of the Bureau of Land Management in developing a reclamation plan. I informed him of the new provisions for the small mine category, and told him that we would contact him when the small mining rules are approved.
